

XSORBTM PLUG

Medennium

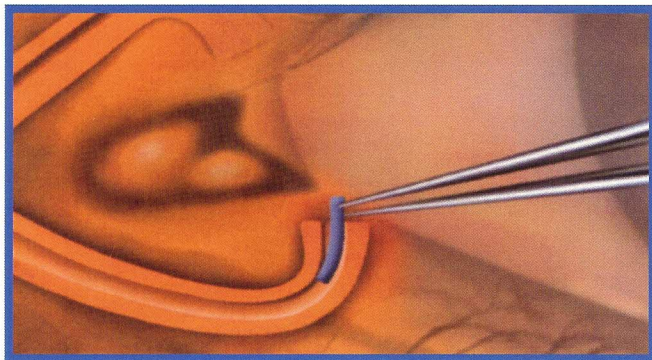

Xsorb plug for temporary use

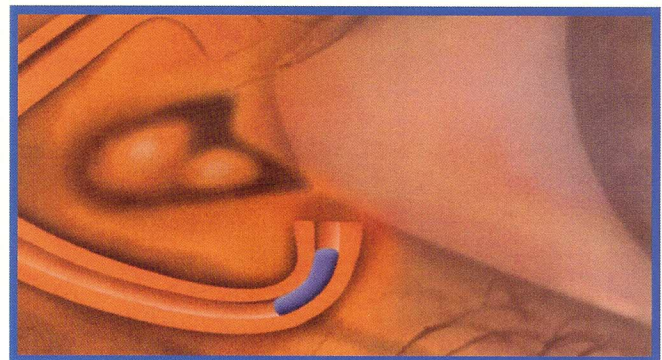

*Now there's a better way to manage
post-refractive dry eye patients*

The Xsorb™ Plug provides immediate dry eye relief and improves patient comfort. Xsorb™ temporary punctum plugs last up to three months, so follow-up visits are kept to a minimum. And with three available sizes, you'll be able to provide an optimal fit for the majority of patients.

*Xsorb™ is a biodegradable synthetic polymer which is a great alternative
for patients who might be sensitive to animal products like collagen*

The Xsorb Plug is introduced into the punctum

The Xsorb Plug rests in place, inside the punctum

To see how well Xsorb™ Plugs can fit into your dry eye practice, call us toll free, today.
